

**Attachment A – FOI2223002 – Document Released in Full**

Under the Act, FOI applicants have a right to seek documents, rather than information or datasets. However, section 17 of the FOI Act also permits FOI agencies to draw information from computers or other equipment and to collate that information into a document, which had previously not existed (**the Relevant Document**). nbn’s FOI Officer determined to release the Requested Document to the Applicant.

Distance to Adelaide GPO (*)	Active nbn satellite services at 1 July 2022	Potential nbn satellite services (**) at 1 July 2022	Grand Total	Subset of complex premises as at 1 July 2022 (***)
0-5km from Adelaide GPO	1	5	6	2
5-10km from Adelaide GPO	40	163	203	183
10-15km from Adelaide GPO	111	555	666	591
15-20km from Adelaide GPO	142	748	890	776
20-25km from Adelaide GPO	115	686	801	756
<b>Total</b>	<b>409</b>	<b>2,157</b>	<b>2,566</b>	<b>2,308</b>

(\*) It is important to note that distance from a capital city’s GPO is not necessarily an indicative measure of whether a given premises can expect to be connected to the nbn™ network via satellite vs. fixed line or fixed wireless services. It is nbn’s practice to deploy Sky Muster™ satellite services where providing fixed line or fixed wireless connections to that area would be unworkable.

(\*\*) It is also important to note that potential, inactive connection numbers:

- are reflective of a point in time and may change due to alterations in nbn’s network deployment plans, such as with upgrades in access technologies;
- would include sites designated for nbn’s wholesale broadband clients, i.e. retail service provider or RSP trial locations and nbn’s own monitoring sites for testing the health of the nbn™ network;
- would also represent sites or locations where end-users may not wish to connect to the nbn™ network, e.g. at an isolated building in a rural, remote or inaccessible location;
- would also include premises where end-users may have chosen not to connect to the nbn™ network and to retain legacy services; and
- would also include premises where end-users may subsequently choose to connect to nbn™ network services at a future date, noting that end-users with Sky Muster™ connections can continue using their legacy (copper line) services and for which there is no mandatory disconnection requirement. This is not the case within the nbn™ network’s fixed-line (copper) footprint, where end-users have roughly 18 months in which to migrate to the nbn™ network before they are disconnected from legacy services.

- *from 2022 are identified using an updated methodology to differentiate more accurately between active services and disconnected services.*

**(\*\*\*)** *Subset of the “Grand Total” column, premises considered “complex” for the purposes of nbn’s Tech Choice program, being ineligible for a Tech Choice quote due to cost or complexity.*
