

# Monthly Progress Report June 2023

Measure	Description	Jun 2022	Dec 2022	Jan 2023	Feb 2023	Mar 2023	Apr 2023	May 2023	Jun 2023
Homes and businesses ready-to-connect	The number of homes and businesses that can order a plan via a phone and internet provider and connect to the nbn access network.	12,100,000	12,200,000	12,200,000	12,200,000	12,200,000	12,300,000	12,300,000	12,300,000
Homes and businesses connected	The number of homes and businesses connected to a plan over the nbn access network through a phone and internet provider.	8,500,000	8,500,000	8,500,000	8,500,000	8,600,000	8,600,000	8,600,000	8,600,000
Right first-time installations #	The percentage of homes and businesses that have their initial nbn equipment installed without additional work from NBN Co the first time the installation is attempted when connecting to the nbn network for the first time.	89%	90%	90%	91%	91%	91%	91%	91%
Meeting agreed installation times	The percentage of premises that nbn connects to the nbn access network within target timeframes with phone and internet providers.	98%	98%	98%	98%	98%	98%	97%	97%
Average network bandwidth congestion	The average number of minutes of bandwidth congestion per week/ per service. This is calculated across all bandwidth purchased by all phone and internet providers across the entire network (CVC congestion). This excludes nbn Sky Muster™ satellite.	28 minutes	29 minutes	25 minutes	26 minutes	36 minutes	52 minutes	29 minutes	41 minutes
Fixed Line network congestion	The estimated monthly average percentage of homes and businesses who experience nbn access network congestion (as per nbn's congestion measures for Fixed Line networks). This excludes nbn Fixed Wireless and nbn Sky Muster™ satellite.	0.000%	0.000%	0.000%	0.000%	0.000%	0.000%	0.000%	0.000%
Fixed Wireless busy hour cell performance	The percentage of cells with a monthly busy hour cell performance of 6 Mbps or more.	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
Fixed Wireless busy hour backhaul performance	The percentage of cells on a backhaul link with a 28 day busy hour packet loss of less than 0.25%	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%	99.8%
Uptake to 50Mbps or over - wholesale plans	The percentage of homes and businesses on a 50Mbps (download) wholesale speed plan or higher; and	76%	77%	77%	77%	76%	75%	74%	74%
	25Mbps (download) wholesale speed plan or lower, purchased from a phone or internet provider.	24%	23%	23%	23%	24%	25%	26%	26%
Network availability	Percentage of time the nbn access network is available and operating. For this measure, the network is considered 'unavailable' during the time nbn is restoring services following the raising of a fault. It does not include periods where the network is unavailable due to operational outages for network upgrades and improvements or events beyond nbn's control. This metric has been rounded to the nearest two decimal places.	99.96%	99.97%	99.96%	99.96%	99.95%	99.96%	99.96%	99.96%
Meeting agreed fault restoration times	The percentage of time nbn resolves accepted faults within nbn's target timeframes with phone and internet providers.	93%	92%	92%	92%	93%	93%	93%	94%
Faults after connection completed (per 100 connected homes and businesses)	The number of faults on the nbn access network per 100 premises per month (excluding faults within 10 business days of the connection).	0.8	0.8	0.8	0.9	0.8	0.6	0.7	0.6
Sky Muster™ Satellite Network Faults	This metric describes the total number of nbn satellite network faults that impacted end user nbn Sky Muster™ and nbn Sky Muster™ Plus services that first arose within the month.	15	10	9	11	16	16	14	4
Sky Muster™ Satellite Network Faults - Average Time to Restore	The Average Time to Restore measures the average time taken for nbn to resolve all nbn satellite network faults which affected the supply of nbn Sky Muster™ and nbn Sky Muster™ Plus services and first arose within the month.	182 minutes	100 minutes	18 minutes	106 minutes	42 minutes	45 minutes	31 minutes	4 hours 54 minutes*

It is important that this Progress Report is read in conjunction with the information on nbn's website at [nbn.com.au/updates](https://nbn.com.au/updates)

# The calculation for 'Right First Time' has been updated in October 2022 and backdated from July 2022. As 'Right First Time' reports on new customers connecting to the nbn network for the first time, the updated calculation excludes existing customers who are upgrading their internet service as part of nbn's fibre upgrade program.

\*The main driver of the nbn Sky Muster satellite average time to restore result was a network outage affecting nbn Sky Muster customers on 23 June 2023 due to a temporary network routing issue at one of nbn's satellite Earth stations.

## Fixed Wireless Busy Hour Cell Performance Categories

The percentage of cells performing within specified monthly busy hour cell performance categories between <3 Mbps and >=25 Mbps.

The percentage of cells in each category is calculated using the number of cells in the relevant category divided by the total number of active cells on the nbn Fixed Wireless network at the end of the relevant month.

Month	Monthly busy hour cell performance category	% of Fixed Wireless Cells in category
June 2023	<3 Mbps	0.00%
	3 to <6 Mbps	0.00%
	6 to <12 Mbps	1.11%
	12 to <25 Mbps	11.88%
	>= 25 Mbps	87.01%

It is important that this Progress Report is read in conjunction with the information on nbn's website at [nbn.com.au/updates](https://nbn.com.au/updates)

## Fixed Wireless Cell Performance by Hours Spent in Categories

A "specified cell" means those cells that have a monthly busy hour cell performance of either <3 Mbps, or 3 to <6 Mbps.

This table shows the average number of hours a day "specified cells" spent in each of the following performance categories (averaged over 30 days):

(1) <3 Mbps

(2) 3 to <6 Mbps

This is expressed as a percentage of all Fixed Wireless Cells, which is calculated by dividing the number of cells that fall into each hourly category by the total number of active cells on the nbn Fixed Wireless network at the end of the relevant month.

June 2023 performance category (cell hourly download)	Average number of hours per day spent in performance category*				
	0 to <1 hours	1 to <2 hours	2 to <3 hours	3 to <4 hours	>= 4 hours
<3Mbps	0.00%	0.00%	0.00%	0.00%	0.00%
3-<6Mbps	0.00%	0.00%	0.00%	0.00%	0.00%

It is important that this Progress Report is read in conjunction with the information on nbn's website at [nbn.com.au/updates](https://nbn.com.au/updates)

\*Note a cell with a monthly busy hour cell performance of under 6Mbps may fall within both of these performance categories, and as such the rows may not add up to the proportion of cells with a monthly busy hour cell performance of under 6Mbps
