

INTEGRATED ROADMAP

SEPTEMBER 2024

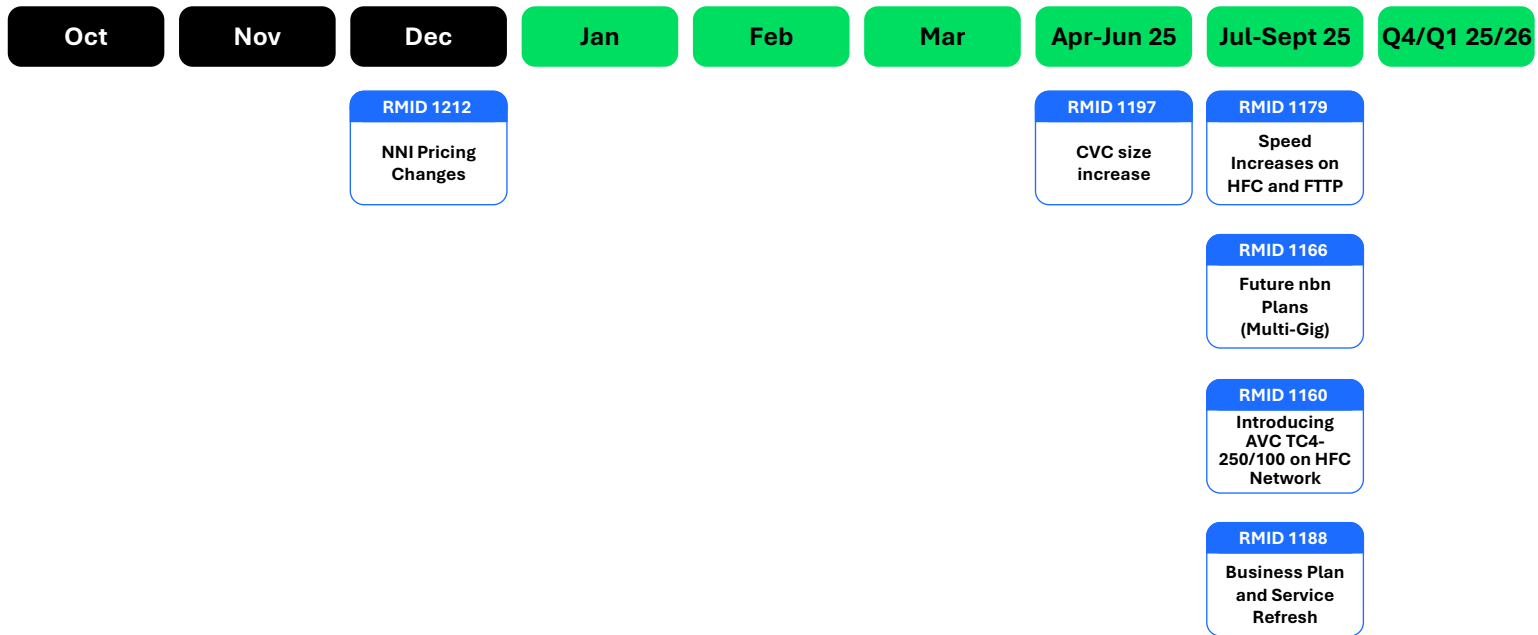

Important notes regarding the use of this document.

The forward-looking statements set out in this document represents nbn’s current position at the time of publication. All dates and proposed milestones are forecast only, are subject to change and are not binding. RSPs should anticipate that the milestones, including launch dates, and the details of the forecasted activities described in this document may change as nbn adapts to changing priorities, as well as in response to RSP feedback (as applicable).

Product and Pricing Catalogue

- Product
- Operational / Process
- Footprint / HFL
- Portals / Tools
- Network / Equipment

The forward-looking statements, including dates and milestones, set out in this document represents nbn's current position at the time of publication. Whilst every effort will be made to keep consistent dates and milestones, launch dates may be subject to change as nbn adapts to changing priorities, and due to circumstances beyond nbn's control. All dates are forecasts only and are subject to change and are not binding.

September 2024 - Network and Footprint

- Oct
- Nov
- Dec
- Jan
- Feb
- Mar
- Apr-Jun 25
- Jul-Sept 25
- Q4/Q1 25/26

Enhance Network Capabilities

FTTP Evolution

Ongoing capacity upgrades and rollout of XGSPON technology to improve speed and performance

HFC Evolution

Ongoing capacity upgrades and plant modernisation to improve speed, performance and reliability

RMID 1156

WNTD Modernisation

RMID 1132

New HFC NTD

RMID 1185

Next Generation FTTP NTDs

Migration of Customers to Fibre and High-Speed FW

Fixed Wireless High Speed Tiers Footprint Expansion

Upgrades to increase available footprint for high-speed tiers

Fibre to FTTB MDU Trials

Increase eligibility of MDU fibre upgrades in FTTB buildings

Fibre Connect Footprint Expansion

Rollout of additional fibre network to increase available footprint for Fibre Connect

RMID 1169

Business Fibre Zone Review

- Product
- Operational / Process
- Footprint / HFL
- Portals / Tools
- Network / Equipment

The forward-looking statements, including dates and milestones, set out in this document represents nbn's current position at the time of publication. Whilst every effort will be made to keep consistent dates and milestones, launch dates may be subject to change as nbn adapts to changing priorities, and due to circumstances beyond nbn's control. All dates are forecasts only and are subject to change and are not binding.

September 2024 - Service Delivery and Partner Interactions

Multifactor Authentication migration window

- Product
- Operational / Process
- Footprint / HFL
- Portals / Tools
- Network / Equipment

The forward-looking statements, including dates and milestones, set out in this document represents nbn's current position at the time of publication. Whilst every effort will be made to keep consistent dates and milestones, launch dates may be subject to change as nbn adapts to changing priorities, and due to circumstances beyond nbn's control. All dates are forecasts only and are subject to change and are not binding.

Roadmap item notes (1)

RMID	Title	Description
RMID 1091	Service Transfer Validation	Enhancements to the Service Transfer process to support the Communications Alliance NBN Access Transfer Code (C647:2023).
RMID 1121	Large Commercial Passenger Aircraft (LCPA)	Enhancements to provide satellite fleet plans and support for transient international airlines.
RMID 1132	New HFC NTD	Introduction of a new single port 2.5G HFC NTD.
RMID 1148	Multifactor Authentication	Program to ensure Multi-Factor Authentication (MFA) is in place in collaboration with RSPs, when accessing nbn platforms.
RMID 1156	WNTD Modernisation	Program to replace older Fixed Wireless NTD versions (V1 or V2) with newer NTD versions (V3 or V4)
RMID 1158	EUAP Migration	Migration to a new External User Administration Portal (EUAP) to manage user access permissions.
RMID 1166	Future nbn Plans	Two new Hyperfast Residential speed tiers (2000/100 HFC and 2000/200 FTTP) and a new business fibre plan (2000/500 FTTP)
RMID 1167	Sky Muster Plus Product Simplification	Simplifies the in-market offerings to residential customers on nbn Satellite and improves the overall inclusions and value proposition.
RMID 1179	Speed Increases HFC FTTP	Increases the speeds received by end users on three existing speed tiers: Home Fast, Home Superfast on FTTP and HFC
RMID1185	Next Generation FTTP NTDs	New standard 1-Port FTTP NTD and new 4-Port NTD (available to users with multiple services or higher speed Business Plans) replacing the current end-of-supply devices and enabling multi-gigabit tiers.
RMID 1188	Business Plan and Service Refresh	Pricing and service level updates to business fibre and Enterprise Ethernet plans.
RMID 1192	Tariff list (FY26) and 3-year Roadmap	3-Year Pricing Roadmap covering charge components and bundled offers.
RMID 1203	Test and Diagnostics Refresh (FTTN/B)	Provides a single and standard testing and diagnostic result for RSPs, nbn agents/workflows and field technicians.
RMID 1205	Enterprise Ethernet Term Extension	Enhancement to Modify Order to enable new term of 12, 24 or 36 months.

The forward-looking statements, including dates and milestones, set out in this document represents nbn's current position at the time of publication. Whilst every effort will be made to keep consistent dates and milestones, launch dates may be subject to change as nbn adapts to changing priorities, and due to circumstances beyond nbn's control. All dates are forecasts only and are subject to change and are not binding.

Roadmap item notes (2)

RMID	Title	Description
RMID 1205	Enterprise Ethernet Term Extension	Enhancement to Modify Order to enable new term of 12, 24 or 36 months.
RMID 1208	Global List and Search API	Global Search and List of RSP Inventory data via B2B systems.
RMID 1211	FY25,FY25 Additional off cycle CVC inclusion adjustment	Adjustment to the amount of CVC TC-4 inclusion for each Bundled TC-4 Offer twice each Financial Year (1 st Jan and 1 st July).
RMID 1212	NNI Pricing Changes	NNI pricing changes to support capacity increases resulting from Speed Uplift programs (RMID1179).
RMID 1213	TC-1 Pricing Changes	Refresh of pricing for TC-1 AVCs 0.3Mbps-5Mbps.
RMID 1215	Business Fibre Upgrade Installation	New larger Fibre Connect internal installation options designed to suit Business Customers upgrading to FTTP.
