3 Year SAU Pricing Roadmap

1 July 2025 to 30 June 2028

Introduction

This 3 Year SAU Pricing Roadmap (**Pricing Roadmap**) is published pursuant to clause 2B.2.4 of nbn's Special Access Undertaking (**SAU**), as varied on 17 October 2023. This Pricing Roadmap takes effect on and from 1 July 2025.

This Pricing Roadmap sets out Prices for each NBN Offer, Other Charge and other WAPC Charge Component, as well as CVC inclusions for each Bundled TC-4 Offer and Bundled TC-2 Offer and Forecast Average Combined Charges for each Bundled TC-4 Offer.

In this Pricing Roadmap:

- the Prices and CVC inclusions for FY26 correspond with the Prices and CVC inclusions in the SAU Tariff List published by nbn for the period 1 July 2025 to 30 June 2026;
- the Prices for FY27 and FY28 are indicative and non-binding, subject to the application of the TC-4 Price Relativity Restriction in the SAU; and
- the Forecast Average Combined Charges for Bundled TC-4 Offers for FY26 are based on forecast industry averages and are calculated in accordance with clause 2F.4.2 of the SAU.

In setting out the indicative Prices for FY27 and FY28 in this Pricing Roadmap, nbn has relied on Consumer Price Index (**CPI**) forecasts in the Statement of Monetary Policy published by the Reserve Bank of Australia (**RBA**) in February 2025. Specifically, the forecast annual percentage change in CPI used to inform nbn's expectations of the application of the price controls under the varied SAU is 3.7% for FY27 and 2.8% for FY28. The SAU price controls which apply to the Tariff List published for FY27 and FY28 will be based on the actual annual percentage change in CPI published for the December quarter before the relevant Financial Year.

Capitalised terms in this Pricing Roadmap have the meaning defined in the SAU as varied on 17 October 2023 unless stated otherwise.

Changes to this Pricing Roadmap

The SAU sets out specific circumstances in which nbn must update Prices and/or CVC inclusions in the Tariff List for a Financial Year. Where nbn updates the Tariff List, it must also update this Pricing Roadmap to maintain consistency, reflecting the changed Price and/or CVC inclusion in the first year of the Pricing Roadmap and any impact on the indicative prices for the second and third years.

For example, the SAU requires nbn to update the Tariff List to reflect:

- the Price on introduction of a new offer;
- a change to the Price of a previously Zero-Priced offer made in accordance with the SAU;
- a Price change resulting from the exercise by the ACCC of certain powers under the SAU;
- a Price change resulting from the SAU restriction on TC-4 discounts;
- a determination by nbn to reduce the Bundled Offer Ceiling or Price of an existing offer in the Tariff List;
- the withdrawal of a Price for an existing offer; and
- an adjustment to CVC TC-4 inclusions made in accordance with the mechanism set out in the SAU.

nbn will publish a new Pricing Roadmap by 1 May 2026 for FY27, FY28 and FY29. That Roadmap will be subject to the TC-4 Price Relativity Restriction in the SAU and may contain different Prices to those set out for FY27 and FY28 in this Pricing Roadmap, including where actual CPI and/or utilisation are different to the CPI and utilisation assumptions used in preparing this Pricing Roadmap.

Notes:

¹ No additional charges apply for CVC TC-4 utilised in conjunction with a Flat-Rate Offer.

² The SAU states that the Basic Bundled Offer (and its Monthly Recurring Charge) will apply on a pro-rated daily basis for each day on which an AVC with the relevant bandwidth profile is used as an input into an Access Seeker Product or Downstream Product which is a broadband service which includes a voice component and utilises 0.1 Mbps of TC-4 (PIR) or less of capacity and that on other days, the offer with a bandwidth profile of 12 Mbps PIR (TC-4) which is not the Basic Bundled Offer (and its Monthly Recurring Charge) will apply on a pro-rated daily basis.

³ From FY27, the Price in the Tariff List for the Connectivity Virtual Circuit Offer (TC-4) in respect of all NBN Co Networks other than the NBN Co Satellite Network will become \$0 (see clause 2E.2.2(d) of the SAU). Accordingly, the NBN Offers that are Bundled TC-4 Offers in FY26 will become Flat-Rate Offers in FY27 in accordance with clause 2B.3.1(d) of the SAU. The Forecast Average Combined Charge for each such NBN Offer for FY27 is forecast to be the Monthly Recurring Fixed Charge of that NBN Offer for FY27 set out above.

⁴ These are potential maximum information rates, not peak information rates.

⁵ On 14 September 2025, nbn increased the AVC Data Transfer Rates (PIR) for the following AVC TC-4 Product Components: (i) 100/20 Mbps to 500/50 Mbps; (ii) 250/25 Mbps to 750/50 Mbps; and (iii) 500 to 1000/50 Mbps to 1000/100 Mbps.

⁶ The 200-250/8-20 Mbps offer is only available at Premises that have a W-NTD version 3 or any later version installed, while the 400/10-40 Mbps offer is only available at Premises that have a W-NTD version 4 or any later version installed.

⁷ The effective charge in FY26 for the 250/100Mbps, 500/200Mbps and 1000/400Mbps bandwidth profiles on Fibre will be lower than the Price shown in Table 1.1 as a result of the 'Accelerating Great – Business Speed Tier Discount'. Refer to the Wholesale Broadband Agreement for further information.

⁸ The Maximum Data Transfer Rate will be less than but close to 1000 Mbps.

⁹ The 2000/100Mbps bandwidth profile is only available at premises that have a HFC CM3500 NTD installed and the 2000/200Mbps and 2000/500Mbps bandwidth profiles are only available at premises that have a 1 Port NTD (version 3 or later) or 4 Port NTD (version 4 or later) installed.
